What type of energy storage projects are recent contracts for?

Recent contracts are predominantly for much larger transmission-connected energy storage projects. Earlier energy storage contracts were significantly more expensive across all grid domains, and they generally reflect the cost reductions seen in the global storage industry.

What does the PU's Energy Storage Procurement Framework do?

The PU's Energy Storage Procurement Framework provides crucial motivation to the development of both demand and supply in this marketplace. Since the time of Assembly Bill 2514 and through 2021 California built a rich ecosystem for energy storage research and development, commercialization, and project deployment.

Do distribution-connected energy storage projects need an interconnection agreement?

Yes, distribution-connected energy storage projects must have an interconnection agreement with the utility. These projects, operating like a generator, must interconnect under the Wholesale Distribution Access Tariff (WDAT), which is regulated by the Federal Energy Regulatory Commission (FERC).

Who published the CPUC Energy Storage Procurement Study?

This work has been developed and published by Lumen Energy Strategy, LLC in Oakland, California under commission by the California Public Utilities Commission.

As the family manager, you're the only individual who can buy a family plan or make membership decisions for the family group. You'll set the household location and can invite or ...
