What is included in a 500KVA solar power plant?

A complete 500kva 500kW solar power plant includes the following configurations: Optional solar mounts, PV combiner boxes, and PV cables. PVMARS provides a complete turnkey photovoltaic energy storage system solution. After we complete production, the system delivered to you can be used immediately after connections are made.

How much does A 500KW solar power system cost?

500kW solar power system costs US\$461,256. (valid for 30 days). Note: The output voltage designed for the 500kW PCS on this page is three-phase 380v-415v. If you request dual voltage 120v/240v, please leave a message about the required output voltage and email solar@pvmars.com to get a quote for customized output.

How can pvmars provide a complete 500KW solar system solution?

The premise of providing a complete 500kw solar system solution requires: You only need to submit load (electrical equipment) information, pictures/drawings of the installation location, output voltage range, and other data. PVMARS's engineering team can provide a complete solar energy storage system (off-grid or mini-grid solution).

Do I need additional accessories to benefit from A 500KW solar system?

You don't need additional accessories to benefit from it. The premise of providing a complete 500kw solar system solution requires: You only need to submit load (electrical equipment) information, pictures/drawings of the installation location, output voltage range, and other data.
