The first component involves the construction of a 40-megawatt solar power generation plant with an estimated cost of 28 million USD. The second component entails the ...

Through surveys conducted in various sites, as well as through contacts, corporations, and data acquisition from national and international organizations, this article ...

The Islamic Emirate of Afghanistan on Thursday officially launched construction of a 40-megawatt solar power generation project in Mohammad Agha District of Logar Province, ...

By replacing diesel generators with solar power, these interventions are improving air quality, lowering energy costs, and making Afghanistan more climate resilient.

By replacing diesel generators with solar power, these interventions are improving air quality, lowering energy costs, and making ...

The Islamic Emirate, in collaboration with Azizi Group, has launched a significant project to construct a solar power plant with a total capacity of 10,000 megawatts.

In response, the UNDP has launched solarization initiatives aiming to tackle Afghanistan's energy challenges through the implementation of solar power. The initiative ...

Solar energy is gaining a foothold in Afghanistan. Young Afghans have been trained in solar power and can offer their services for the repair and maintenance of solar systems in various ...

Now, the country aims for energy self-sufficiency through efficient utilization of solar and wind energy, as

well as ensuring proper ...

Afghanistan has been facing a power shortage. The country is largely dependent on power imported from the neighboring states of Iran, Tajikistan, Uzbekistan and Turkmenistan.

Its electricity is provided mainly by two sources, the Kajaki hydroelectric power station in neighboring Helmand Province and solar farms on the outskirts of the city.

Now, the country aims for energy self-sufficiency through efficient utilization of solar and wind energy, as well as ensuring proper water resource management. Afghanistan also ...
