Will Mali build a solar power plant in West Africa?

In March 2024, the two discussed strengthening cooperation, and on May 24, the countries launched a large solar plant project in southwestern Mali. Mali and Russia on Friday launched the construction of the largest solar power plant in West Africa, Malian Energy Minister Bintou Camara said on national television.

Will China build a solar plant near Bamako?

Construction of two other solar plants near Bamako is scheduled to start on May 28 and June 1 and be built by Chinese and Emirati companies. Moscow has steadily gained influence in Mali through the deployment of Wagner Group mercenaries, unofficially serving the Kremlin's aims in resource-rich Africa since the 2010s.

Will a new solar station increase Mali's electricity production?

Grigory Nazarov, director of NovaWind, the Russian company in charge of the construction, said it is expected to increase Mali's electricity production by 10%. NovaWind is a subsidiary of Russia's nuclear agency Rosatom. The 200-megawatt solar station will cover 314 hectares in Sanankoroba, in southwestern Mali, close to the capital, Bamako.

How much electricity does Mali get from solar power?

As of May 2024, Mali obtains 70 percent of its electricity from fossil-fuel sources. This solar farm, when completed, will be the largest solar power station in the country and in West Africa. It is expected to increase the country's electricity generation capacity by 10 percent.

Mali has started construction of West Africa's largest solar plant with the support of Russia's NovaWind - a subsidiary of nuclear energy corporation Rosatom.

Mali, faced with chronic electricity supply problems, has launched the construction of a 200 MW photovoltaic solar power plant in Sanankoroba, near Bamako. This initiative, carried out in ...

Following last Friday's inauguration of a first solar power plant in Sanankoroba, the largest in West Africa, with the help of Russia, Mali's Safo region is now hosting the ...
