From product availability to installation and maintenance, Solar Boost is your trusted supplier of premium-grade micro inverter models from various partner brands and manufacturers in Malaysia.

Where is Bandar Seri Begawan located?

Bandar Seri Begawan is located at latitude 4.89035 and longitude 114.94006. It is part of Asia and the northern hemisphere.

Are micro inverters a good alternative to a string solar inverter?

According to solar manufacturers and experts, micro inverters can potentially improve power outputs by as much as 25%. When used for a long period of time, this efficiency percentage is definitely no small number. If you're looking for an alternative to your string solar inverter, micro inverters may just be the answer for you.

How do I know if my inverter is good in Malaysia?

Make sure the inverter meets Malaysia's grid codes and safety regulations. Look for SIRIM certification or other recognized approvals to avoid issues during installation or inspection. A longer warranty (usually 5-10 years) is a good sign of quality. Also, check if the brand has local service centers or partners in Malaysia.

A Microinverter or a Solar micro-inverter is an extremely small device used to convert DC to AC. These inverters are so small that they are used as plug-and-play.
