By streamlining our processes, minimising waste, and continuously improving our operations, we ensure that our battery packs meet the highest standards of quality and efficiency.

Manufacturing custom lithium-ion battery packs requires precise engineering, quality control, and safety standards. The process involves gathering requirements, selecting cells, concurrent ...

In this battery manufacturing guide, we'll dive into the key quality control practices involved in the lithium-ion battery production process, highlighting the detailed steps that ensure a high ...

Manufacturing custom lithium-ion battery packs requires precise engineering, quality control, and safety standards. The process involves gathering ...

This digital technology enables development centers and factories to manufacture battery cells, modules, and packs that meet quality, throughput, cost, and sustainability goals.

This digital technology enables development centers and factories to manufacture battery cells, modules, and packs that meet ...

Abstract This project applied Six Sigma principles to improve the electric vehicle battery pack assembly process.

What we are seeing across the battery manufacturing landscape is an extraordinary drive to meet unprecedented demand, and this environment makes digital ...

In addition to Seal Integrity verification, End of Line quality checking must include control of electrical insulation of the housing, measurement of main functional parameters such as OCV, ...

By streamlining our processes, minimising waste, and continuously improving our operations, we ensure that our battery packs meet the highest ...

However, detecting latent cell defects --which are responsible for these battery quality issues--during production is notoriously ...

Rapid adoption of electric cars has enhanced that for clean batteries to reduce environmental impact and increase recyclability.

However, detecting latent cell defects --which are responsible for these battery quality issues--during production is notoriously challenging. In this post, we evaluate the ...

From electrode manufacturing to the quality inspection of cells right through to the thorough checking of modules and packs - the solutions from SICK cover the entire process ...
