Some key takeaways from BloombergNEF 's Energy Storage System Cost Survey 2024: ? Turnkey energy storage system prices fell 40% year-on-year to a global average of US\$165/kWh in...

The global energy storage market almost tripled in 2023, the largest year-on-year gain on record. Growth is set against the backdrop of the lowest-ever prices, especially in ...

Global average prices for turnkey battery storage systems fell by almost a third year-over-year, with sharp cost declines expected to continue. In 2025, the global average price of a turnkey ...

A growing industry trend towards larger battery cell sizes and higher energy density containers is contributing significantly to falling battery energy storage system (BESS) costs.

In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are ...

Global average prices for battery storage systems fell by almost a third year-over-year, with sharp cost declines expected to continue.

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage ...

Energy storage system prices have fallen to their lowest level on record, dropping to a global average of \$117/kWh in 2025. The new figures come from BloombergNEF's Energy ...

Base year costs for utility-scale battery energy storage systems (BESSs) are based on a bottom-up cost model

using the data and methodology for utility-scale BESS in (Ramasamy et al., 2023).

BNEF's higher tariff scenario, at 145%, leads to between 51% and 74% lower build annually between 2025 and 2027 relative to BNEF's base-case scenario. With higher-than ...
