-----

Grid connection queues in Brazil are offering new opportunities for energy storage and hybrid systems and opening new energy business models. Renewable energy companies ...

An unreliable grid is driving Brazilian energy storage demand. The world is set to have more than 760 GWh of energy storage capacity ...

But hold onto your caipirinhas--this South American giant is fast becoming a hotspot for new energy storage projects. With abundant sunlight, ambitious climate goals, and ...

According to IHA, over 105 GW of pumped storage projects are under construction globally, with accelerated growth projected through ...

Norwegian company Statkraft is considering installing batteries next to the Sol de Brotas 7 solar photovoltaic plant in Bahia. The energy storage system (ESS) will have 1.25 ...

Explore Brazil's battery energy storage systems, focusing on current regulations, investment opportunities, and the role of these systems in the energy transition.

An unreliable grid is driving Brazilian energy storage demand. The world is set to have more than 760 GWh of energy storage capacity by 2030, led by Chinese and United ...

As Latin America's largest economy steps closer to mainstreaming battery energy storage, the world will be watching how Brazil balances ambition with regulatory clarity -- and ...

Brazil's new 2025 energy storage regulations create urgent opportunities for businesses to pair solar with
