What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

What is a containerized generator enclosure?

Our containerized generator enclosures are built to be highly mobile, allowing you to easily transport and relocate your generator equipment as needed. The modular design enables quick assembly and disassembly, making it an excellent choice for temporary power needs or projects requiring frequent relocation.

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

We've long had a reputation as a provider of never-before-seen power products -- and will offer you all the engineering and manufacturing ...

Green Power Systems offers the possibility of installing generators inside CONTAINERS of 10' / 20' (BOX and HC) / 30' / 40' (BOX and HC) or SHELTERS according to the customer's ...

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ...

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of ...

We've long had a reputation as a provider of never-before-seen power products -- and will offer you all the engineering and manufacturing support you need to customize your generator ...

We're talking about an all-in-one unit that combines a generator with an ISO container, which simplifies transport and installation. You can easily move ...

Green Power Systems offers the possibility of installing generators inside CONTAINERS of 10" / 20" (BOX and HC) / 30" / 40" (BOX and HC) or ...

Each manufactured containerised generator is acoustically lined to achieve the external sound levels required at your site. We build each container from scratch with special louvres for free ...

With outstanding & reliable performance, it is widely used in construction, communication, finance, mining, as well as rental and other special occasions.

Discover durable generator containers designed for secure power storage and protection in any environment. Ideal for industrial, commercial, and emergency applications.

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application ...

With outstanding & reliable performance, it is widely used in construction, communication, finance, mining, as well as rental and other special ...

Discover durable generator containers designed for secure power storage and protection in any environment. Ideal for industrial, ...

It utilizes shipping containers or modular structures to create a self-contained environment for generators of various sizes. These enclosures are specifically engineered to provide flexibility, ...

PowerLink container generators is an outdoor power solution which meets perfectly projects requirements. We provide standardized container and customized container for different ...

We're talking about an all-in-one unit that combines a generator with an ISO container, which simplifies

transport and installation. You can easily move it around or even stack it up like any ...
