-----  
What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.

Does stealth power offer solar for shipping containers?

We are proud to partner with one of the leading providers of factory installed solar options for shipping containers. Learn more about the product and inquire below. Who is Stealth Power? Stealth Power provides fleet electrification and off grid solar solutions for customers of all kinds.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

Can a mobile solar container run a petroleum company?

Once deployed, runs indefinitely without the need to supply fuel. Petroleum companies often operate in distant locations with limited access to grid power. This is where a mobile solar containers can act as an additional power source to run the equipment.

Discover the world's leading foldable solar container with 40% higher energy density. Solarfold(TM) by Sunmaygo offers quick deployment & 70% lower costs than diesel. Get your free quote today!

Quick setup and installation -- fully off-grid and ready to operate in no time. Custom configurations based on your specific needs -- including options such as water purification, ...
