Today's question is, "Do Solar Water Pumps Need Batteries?" A majority of our solar water pump systems don't require batteries because they're direct drive. That means we take the power ...

To troubleshoot a malfunctioning solar water pump, begin by inspecting the solar panel for cleanliness; dirt can impede performance, so use a soft cloth for cleaning. Next, ...

The right battery is more than backup--it's the heart of your system's everyday operation. Choose carefully, plan thoroughly, and always question easy answers.

HT TIME ONLY. Continual on Mode: PRESS [Power on/off] BUTTON, THE TOP INDICATOR LIGHT [Continual on] WILL BE ON - THE PUMP WILL RUN CONTINUOUSLY UNTIL THE ...

If your fountain's solar pump is equipped with a battery, then it may simply need to be recharged. Allow the solar panel to sit in direct sun for a whole day. If it won't operate, the ...

Do not charge the solar battery back-up by any AC power supply directly; it is designed ONLY for DC power. Do not leave this battery back-up in bad ambient environment. Do not leave the ...

In this article, you'll discover the ins and outs of battery replacement, including signs that it's time for a change and tips on selecting the right battery for your system.

While it does make sense for some customers to add a battery bank (especially with low GPM wells and for household water pressure), whenever possible, our engineers do recommend ...

Replacing a solar battery involves several steps that must be executed methodically to ensure both safety and
