---

The large-scale 250 megawatts (MW) battery will store enough renewable energy to power one-third of the city of Canberra for two hours during peak demand, helping to ...

This allows renewable energy to flow to homes and business across Canberra when demand is high and solar generation drops. Construction is now underway on concrete ...

Unlock the potential of battery energy storage systems for quality solar systems in Canberra, enabling energy independence and cost savings.

The Australian Capital Territory (ACT) government has announced the development application has been approved to deliver the ...

The Australian Capital Territory (ACT) government has announced the development application has been approved to deliver the first stream of the Big Canberra ...

Canberra is taking bold steps towards a sustainable future, with recent initiatives set to transform how we generate, store, and use energy. Here's what you, as a Canberra ...

The Fadden and Dickson energy storage systems have been installed and are expected to be operational by the end of November 2025. This pilot project received funding ...

The large-scale battery storage system in Williamsdale will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. This is enough energy to power one-third ...

The large-scale 250 megawatts (MW) battery will store enough renewable energy to power one-third of the city of Canberra for ...
