The projects developed by AES Andes will be located in the Antofagasta region of Chile. It will feature a wind farm with an installed capacity of 140 MW and a 252 MW ...

Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and battery energy storage systems (BESS).

The projects developed by AES Andes will be located in the Antofagasta region of Chile. It will feature a wind farm with an installed ...

Last month, AES Andes announced 1.3GW of co-located renewable energy projects in Chile, including the Pampas project, a solar-wind-storage hybrid site in Antofagasta ...

Situated in the Taltal commune within Chile's Antofagasta region, the development will occupy about 2,064 hectares (5,100 acres). According to the EIS, the complex will utilize over 1.39 ...

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022.

Limes Renewable Energy has secured the Environmental Qualification Resolution (RCA) for its Pradera Larga project in Chile's Valparaíso Region -- a major milestone in the ...

Limes Renewable Energy, a global developer specialising in solar, wind, and battery energy storage systems (BESS) projects, has secured the environmental qualification ...

Last month, AES Andes announced 1.3GW of co-located renewable energy projects in Chile, including the
