Does Mozambique need a transmission system?

The northern areas of Mozambique, in particular the Nampula-Nacala area, have experienced significant industrial electricity demand. However, the required capacity of the transmission infrastructure far exceeds the transfer limit on the existing system.

Why does Mozambique want Gridworks to invest in the chimuara-Nacala project?

With only half of the population having access to electricity, the Chimuara-Nacala project is a priority for Mozambique, and Gridworks' involvement reflects the Government's desire to attract private sector financing for the development of its key infrastructure.

Why should Mozambique invest in transmission infrastructure?

Chris Chijiutomi, Managing Director and Head of Africa at BII, said: "Investing in transmission infrastructure is as vital a component of delivering affordable energy as providing additional renewable energy generation in the continent. This strategic project once completed will make a huge difference to so many people in Mozambique."

How will the Mozambique power project impact the economy?

Expected Impact: Economic Development: the project will significantly improve the quality of power supply and electricity in the central and northern regions of Mozambique, especially the provinces of Zambezia and Nampula which have the lowest electricity access rates in the country (25% and 18% respectively).

The distribution cabinets customized by the National Grid Company of Mozambique need to be designed specifically in combination with the local power infrastructure upgrade requirements, ...
