ergy developers and investors. Having traditionally been an energy importer, Finland is on the verge of becoming a significant exporter of clean power, hydrogen and synthetic fuels. This ...

The European Commission has granted EUR52 million to nine renewable energy projects in Finland and Estonia, aiming to boost regional capacity in solar and wind power.

A low solar energy share in Finland's renewable energy mix is due to intermittent solar energy availability (day-night and summer- winter cycles). The market therefore relies heavily on wind, ...

Explore the rapid growth of solar power in Finland, backed by EUR16.6M in subsidies. See how Finland's solar energy strategy is paving the way to carbon neutrality.

The European Commission has announced the allocation of EUR52 million in funding support through the EU Renewable Energy Financing Mechanism (RENEWFM) to nine ...

Read about solar power production, its costs and environmental effects and the project development of the solar power plant. Renewables Finland currently maintains three up-to ...

The share of solar power in Finnish electricity production is approaching one percent and won't stop there: plans are in place to build several solar farms in Finland, each ...

Solar power in Finland is contributing to the transition towards low-emission energy production. Technological development, falling costs and climate goals have together ...

Finland's climate strategy, aimed at carbon neutrality by 2035, focuses on increasing energy efficiency and
