West Africa's bustling hub of Dakar faces a dual energy challenge: growing electricity demand and increasing renewable energy integration. Distributed energy storage systems (DESS) have ...

Explore how the interdependence of water, energy, and food systems is crucial for sustainable development in South Africa, where challenges like water scarcity and energy instability ...

Discover how Dakar's battery storage solutions drive renewable adoption and stabilize energy grids across West Africa.

Discover how Dakar is embracing renewable energy solutions through off-grid storage systems. This article explores the current number of power stations, market drivers, and how solar ...

Work on a solar energy and battery storage project in Senegal, touted to be the biggest in West Africa once it goes live, is set to begin next month after an EPC (Engineering, ...

Discover how cutting-edge energy storage systems are transforming Dakar's renewable energy landscape - and why this matters for businesses and communities alike.

As part of the Cap des Biches Gas-to-Power Project, two natural gas delivery stations, and heavy fuel oil (HFO) storage tanks with a 3,000 cubic meter capacity will be built.

Largest photovoltaic with added battery energy storage systems (BESS) project in West Africa, accelerating the uptake of critical battery technology in the region. The investment ...

We're looking forward to starting construction on this battery storage project in Senegal, expanding on our existing Parc Eolien Taiba N'Diaye wind farm, and helping to ...
