Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, ...

Fraunhofer's ocean spheres store renewable energy using deep-sea pressure--enough to power millions of homes annually.

"We are pleased to announce the selection of new grid-scale solar and battery storage projects that will provide affordable, reliable clean energy to Connecticut residents and ...

This initiative seeks measures that, either singularly or in aggregation, will provide electric summer and winter demand savings of at least 1 MW over their lifetime. Comments submitted ...

Governor Kathy Hochul today announced over \$5 million is now available for long duration energy storage projects through New York State's Renewable Optimization and ...

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

With a combination of solar power and innovative battery storage, these projects are set to significantly impact both the environment and the economy, potentially saving ...

DEEP is seeking to procure standalone energy storage projects and energy storage projects that will be paired with Class I renewable energy sources or hydropower ...

Fraunhofer Institute created the StEnSea project to store energy within the ocean depths. Underwater spheres use natural deep-sea pressure to operate an innovative method ...

# Deep Energy Storage Project
