-----  
What telecommunications does Equatorial Guinea have?

Telecommunications in Equatorial Guinea include radio, television, fixed and mobile telephones, and the Internet. no AM, 3 FM, and 5 shortwave stations (2001). 1 TV station (2001). The state maintains direct or indirect control of all broadcast media. The government owns the only national radio and television broadcast system, RTVGE.

What was the first national mobile network of Equatorial Guinea?

This paper focuses on the modernization of the first national Mobile Network of Equatorial Guinea, called GETESA. Equatorial Guinea has three telecommunication companies: GETESA, Muni and Gecomsa. Getesa is the largest and the historical Equatorial Guinea telecommunication company established in 1987.

Why did GETESA become a national mobile network of Equatorial Guinea?

This paper focuses on the modernization of the first national Mobile Network of Equatorial Guinea, called GETESA. The government's decision to invest and take full control of the network was motivated by the lack of network quality, which had poor capacity, with 69% of the network coverage Received-Signal-Code-Power (RSCP) below 95dBm.

Does Equatorial Guinea have Internet access?

The Equatorial Guinea government did not respond to the AP's inquiry about the island, its condition and internet access. Located in the Atlantic Ocean about 315 miles (507 kilometers) from Equatorial Guinea's coast, Annobon is one of the country's poorest islands and one often at conflict with the central government.

Residents of Annobon island in Equatorial Guinea have faced severe internet outages since complaining about dynamite explosions by a Moroccan construction company.
