Americase designs each lithium battery storage container to perform under extreme conditions, providing unmatched thermal protection, shock resistance, and modular scalability.

The project focuses on enhancing the European supply chain by integrating both natural and recycled graphite, improving processing methods, and contributing to environmental ...

Our crates and boxes dedicated to the transport of lithium batteries are designed according to current standards to ...

Explore the innovations in lithium ion battery storage containers with Maxbo. Discover high-energy-density technology, modular designs, advanced BMS, and eco-friendly solutions ...

Once batteries are removed at the assembly line, two-unit loads can fit together and packed into one lithium battery container, to reduce return shipping costs.

The lithium ion battery packaging utilises standard footprints designed to interface with customers' existing supply chains. Once batteries are removed at the assembly line, two-unit loads can fit ...

Our battery packaging can be made from conductive plastics and protects your sensitive components from dangerous electrostatic discharges ...

GR4FITE3 creates a whole new supply chain to achieve a more efficient production of lithium-ion batteries in Europe for use in electric vehicles and energy storage systems applications for ...

Europe for use in ...

Once batteries are removed at the assembly line, two-unit loads can fit together and packed into one lithium battery container, to reduce return ...

Combined the lithium ion phosphate A+ Grade cell with self-developed EMS, BMS and other core components, our products have features on long life, high safety and high reliability.

Our battery packaging can be made from conductive plastics and protects your sensitive components from dangerous electrostatic discharges (ESD). They are also suitable for semi ...

Our crates and boxes dedicated to the transport of lithium batteries are designed according to current standards to accommodate your batteries and ensure safe transport.

The wide range of our state-of-the-art CellPac LITE battery packs includes batteries with UL 2054 and IEC 62133 certifications, thereby significantly reducing the design-in cost and time-to ...
