-----

GP-PBS1000-LTE Series is a high-performance, industrial-grade LTE FDD private station designed for outdoor deployment. It supports multiple frequency bands and flexible ...

In the area of wireless computer networking, a base station is a radio receiver/transmitter that serves as the hub of the local wireless network, ...

The Baicells Nova249 is a high-power LTE FDD base station designed for outdoor deployments requiring broad coverage and high capacity. Operating in FDD mode with 2x2 MIMO and 40W ...

This white paper will discuss the EVM measurement as a key component of transmit signal quality in 5G private network base stations, the testing challenges that mmWave poses, and the ...

The base station features an all-in-one design that integrates both baseband and RF, ensuring a compact size, high integration, and easy installation. Its superior performance and stable ...

The Baicells Nova243 is an outdoor LTE TDD base station (eNodeB) designed for private network deployments across Bands 41, 42, 43, and 48. With dual 10W output power and 2x2 MIMO, it ...

The energy-efficient Base Station is IP67 rated and can be powered by renewable power sources like solar and wind, making it an ideal solution ...

To enhance system efficiency and establish green wireless communication systems, this paper investigates base station sleeping and power allocation strategy based on ...

of the local wireless network, and may also be the gateway between a wired ...

CableFree offers Band 46 5GHz LTE Base Station and Outdoor CPE devices for operation in Unlicensed 5GHz spectrum, enabling smaller operators and private customers to build LTE ...

The Baicells Nova249 is a high-power LTE FDD base station designed for outdoor deployments requiring broad coverage and high capacity. ...

The energy-efficient Base Station is IP67 rated and can be powered by renewable power sources like solar and wind, making it an ideal solution for areas with limited or no power infrastructure.

BaiCells Base Stations are perfect for private and public deployments. They offer terrific performance and help operators provide higher capacity and better coverage.
