-----

The latest example of a clean transition innovation is the development of battery energy storage in telecommunication networks to ...

Elisa, a telecommunications firm in Finland, has received EUR3.9 million in funding from the government to create a Virtual Power Plant (VPP) using ...

The solution is now linked to the base station batteries of DNA Tower Finland, and the battery capacity is being made accessible to the ...

Finnish telecommunications company Elisa is set to enhance the efficiency of a groundbreaking 100MWh Sand Battery project in Finland's electricity reserve market.

The latest example of a clean transition innovation is the development of battery energy storage in telecommunication networks to even out fluctuations in the electricity market.

The solution is now linked to the base station batteries of DNA Tower Finland, and the battery capacity is being made accessible to the Fingrid-maintained Finnish power reserve ...

The project marks the company's third battery in Finland, bringing its storage capacity in the country to 149 MW/374 MWh. Founded in 2008, Neoen is active across solar, ...

Finish telcom operator Elisa has been selected to provide optimization services for a landmark 1 MW/100 MWh thermal energy sand-based storage system developed by ...

The solution is also capable of utilising solar energy in addition to grid energy. Elisa uses this technology

itself in its own mobile network in Finland and has begun deploying it in the ...

SEB Nordic Energy's portfolio company Locus Energy, in collaboration with Ingrid Capacity, proudly announces the groundbreaking of one of Finland's largest battery energy storage ...

The project follows a successful trial deployment by Elisa with Åland Islands-based telecoms provider Ålcom and local solar PV company Solel Åland. In addition to supplying ...

However, Finnish operator Elisa has taken a new perspective on the role and value of battery storage, particularly in the context of increasingly volatile energy markets where ...

The project follows a successful trial deployment by Elisa with Åland Islands-based telecoms provider Ålcom and local solar PV ...

Elisa, a telecommunications firm in Finland, has received EUR3.9 million in funding from the government to create a Virtual Power Plant (VPP) using batteries. This VPP, which is ...
