-----  
What are the benefits of a solar system in Georgia?

Georgia's primary state-level benefit is its local-option property tax exemption, complemented by a statewide net metering policy. A 30% credit on the total cost of your system against your federal income taxes. The most significant financial incentive available. A local-option exemption on the value added to your home by a solar system.

Does Georgia have a solar rebate program?

As of January, Georgia doesn't have any local incentives or rebate programs. However, Georgia Power will buy back the excess energy a solar panel system creates at a rate less than the retail cost of energy.

What is the Georgia Environmental Finance Authority solar program?

The Georgia Environmental Finance Authority Solar Program is renowned as one of the state's top incentives for fostering the growth of large-scale renewable energy projects. The program is intended to assist Georgia homeowners looking to install solar panels while alleviating the cost.

How much does solar energy cost in Georgia?

It is possible to have solar energy in Georgia, and the most southern part of the state has sun levels that match those of Florida. Currently, the average price of 5-kilowatt solar installation in Georgia is between \$13,500 and \$12,733. That is the price before you claim the 30% federal tax credit.
