Qair operates 31 MW of wind and solar assets in Germany ...

EnBW has inaugurated an integrated energy park in Baden-Württemberg, Germany, that combines solar power, wind power, and ...

Qair operates 31 MW of wind and solar assets in Germany and is actively developing a pipeline of over 600 MW. This includes two wind farms totalling over 43 MW and ...

Norwegian state-owned utility Statkraft AS has commissioned the Zerbst solar-plus-storage project in Saxony-Anhalt, Germany, which combines 46.4 MW of power-generating capacity ...

From 2022 to 2023, Germany saw installations of new wind and solar power nearly double, a shift driven in part by sweeping changes to simplify permitting for clean ...

One compelling innovation is hybrid renewable energy projects that integrate on-site storage with solar or wind generation.

Construction has officially begun on Germany's wind and solar energy storage power station, a landmark initiative to stabilize renewable energy supply. This project addresses one of the ...

Drawn up jointly by the ministries of transport, environment and economic affairs, the draft law contains planning and approval provisions for onshore wind power and ...

A bill on planning and authorization requirements for onshore wind and photovoltaic power generation was drafted jointly by the Ministries of Transport, Environment and ...

Germany s new wind and solar energy storage project
