NLR employs a variety of analysis approaches to understand the factors that influence solar-plus-storage deployment and how solar-plus-storage will affect energy systems.

The following provides information on California energy storage legislation, the CPUC energy storage program and projects evaluation, CPUC energy storage proceedings, ...

While the energy storage market continues to rapidly expand, fueled by record-low battery costs and robust policy support, challenges still loom on the horizon--tariffs, shifting ...

Energy Storage Legislation
Energy Storage Procurement to Date
Energy Storage Procurement Evaluation
Scaling Up and Crossing Bounds
Energy Storage Proceedings
Other Energy Storage Related Rulemakings
Additional Resources
To date the CPUC has approved procurement of more than 1,533.52 MW of new storage capacity to be built in the State. Of this total 506 MW are operational. The AB 2514 mandate is procured in three distinct grid domain targets, with some flexibility between the grid domain targets of customer sited, distribution-connected, and transmission connected....See more on cpuc.ca.gov

DOE ESHB Chapter 20 Energy Storage Procurement
This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), ...

These resources provide information and best practices for federal facilities interested in procuring on-site solar photovoltaic (PV) systems.

This energy storage technical specification template is intended to provide a common reference guideline for different stakeholders involved in the development or deployment of energy ...

The focus is on ground-mounted systems larger than 5M AC, including photovoltaic (PV) standalone and PV+battery hybrid projects (smaller projects are covered in Berkeley Lab's ...

Streamlined solar and energy storage buying process through the use of a proven cooperative procurement program. Free project feasibility study and savings analysis for any public agency ...

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), ...

The Federal Energy Management Program's (FEMP) Distributed Energy and Energy Procurement initiative helps federal agencies accomplish their missions through investment in lasting and ...

Learn about the essential elements of a solar RFP; receive introductory guidance on how to evaluate any proposals received; and be directed towards tools, resources, and ...
