---

This is the case for the hybrid power station (HPS) located on the Greek island of Tilos, currently managed by Eunice Energy Group (EEG). This generation system employs a ...

Athens, Greece-headquartered PPC Group, a South-East European electric utility Group, has started building a hybrid energy project on Astypalea island, Greece. The island is ...

Implemented by the Greek Centre for Renewable Energy Sources and Saving (CRES), the initiative combines a 1 MW hybrid wind ...

The Greek island of Crete is set to become home to 120 MW of hybrid renewable power stations under a winder plan that aims to ...

This project exemplifies the rapid evolution of Greece's renewable energy sector, integrating large-scale solar PV with advanced green hydrogen technologies to support ...

Athens, Greece -- ZEOLUFF, a Chinese clean energy brand highly recognized for its deep specialization in wind-solar hybrid technology, announced today that its jointly developed ...

Implemented by the Greek Centre for Renewable Energy Sources and Saving (CRES), the initiative combines a 1 MW hybrid wind and solar power station with 2.56 MWh of ...

Hybrid power plant to keep Athens International Airport at net zero through 2046 AIA's PV-BESS plant will generate an estimated 88 GWh per year, which is equivalent to the ...

Greek utility PPC Group has officially broken ground on a hybrid solar and battery energy storage system (BESS) on the island of Astypalea, aiming to cover more than 80% of local electricity ...

TILOS Project was part of the pioneering European Research Project Horizon 2020 and Eunice Energy Group, as the leading private sector member in the consortium, designed, funded, built ...

Greek renewables developer Eunice Energy Group stepped in, funding the project's 160 kW of solar capacity and 800 kW of wind power equipment, and now owns the ...

Greek renewables developer Eunice Energy Group stepped in, funding the project's 160 kW of solar capacity and 800 kW of wind ...

The Greek island of Crete is set to become home to 120 MW of hybrid renewable power stations under a winder plan that aims to strengthen the energy security of the country's ...
