What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects--all while reducing carbon footprint and cutting energy costs.

What is Australia's affordable container home solution?

Australia's affordable container home solution. Specialising in prefab shipping container homes, we present a new paradigm in transportable homes with sustainability options you'll find nowhere else.

How much does a container cost?

The cost of a single used container typically ranges from \$1,500 to \$4,500, depending on its size, condition, and location. Standard sizes are 20 feet and 40 feet long. New containers can be more expensive, ranging from \$3,000 to \$6,000. Delivery fees also play a significant role in the initial cost.

How much does it cost to build a container home?

This post provides a detailed cost breakdown, helping you understand the financial commitment involved in creating your dream container home. The first step in building a container home is purchasing the shipping containers. The cost of a single used container typically ranges from \$1,500 to \$4,500, depending on its size, condition, and location.
