When did Iraq reorganize its electricity sector?
While some of the damage of the 1991 war was repaired and about 4,500 MW of generating capacity was available in 1999when Iraq reorganized its electricity sector. The sector was separated from the Ministry of Industry,and the Commission of Electricity (CoE) was established on June 21,1999.

How does Iraq generate electricity?
Iraq's electricity generation primarily depends on fossil fuels. In 202,natural gas was the largest source at 50.4% of the total,followed by oil at 47.6%. Renewable energy,mainly from hydroelectric power,contributed 2%. As of 2023,the 30 gigawatts (GW) of installed capacity cannot meet summer peak demand.

How many power plants did Iraq have in 1990?
The 1990 installed capacity of 9,295 MW consisted of 120power-generating units in various thermal,gas turbine and hydroelectric power stations. Approximately 70% of Iraq's installed power generating capacity was damaged or destroyed during the 1991 Gulf War.

How much electricity does Iraq need?
Summer peak demand 6,800-7,500 MW; 35 to 40% of the summer peak demand cannot be satisfied at present. Lack of electricity tends to affect more severely the most vulnerable groups of Iraq's society and increases their morbidity and mortality. Ongoing efforts need to be maintained and new actions to increase electricity supply need to be initiated.
