From Japan and Portugal to Ireland and Australia, some countries will fund your escape to the countryside. Here are some examples of rural relocation grants.

The plant comprised grid connected hybrid powered flywheels and battery technology. The fast responding plant was designed to allow energy to be ...

These are the jobs predicted to see the highest growth in demand and the skills workers will likely need, according to the Future of Jobs Report 2025.

ESB has today opened its latest major battery plant at its Aghada site in Co Cork which will add 150MW (300MWh) of fast-acting energy storage to help provide grid stability ...

Although it was among the nations hardest hit by the 2007/8 economic crisis, Ireland's economy has bounced back.

Davos 2025, the Annual Meeting of the World Economic Forum, takes place from 20-24 January under the theme, Collaboration for the Intelligent Age.

Our members are delivering the energy storage projects alongside ESB Networks that are needed to reduce the use of fossil fuels and drive down energy prices while ensuring a ...

Every battery storage project connected makes our electricity grid more secure and helps to integrate wind and solar power. Today, in May 2022, we have 13 projects operating with a ...

Two memos setting out future plans for development of electricity storage, which will allow excess renewables to be stored and used when needed, and for private wires have been ...

More than 700 megawatt (MW) of battery storage was active at the end of 2023 and another 500 MW has been contracted to connect over the next five years. These storage ...

The majority of the top 10 most gender-equal countries are in Europe, with Ireland and Spain re-entering the top 10 this year. Here's what you need to know about the four ...

ESB has opened its latest major battery plant at its Aghada site in Co Cork which will add 150MW (300MWh) of fast-acting energy ...

More than 700 megawatt (MW) of battery storage was active at the end of 2023 and another 500 MW has been contracted to connect ...

Two memos setting out future plans for development of electricity storage, which will allow excess renewables to be stored and ...

A community virtual power plant with battery storage could reduce power outages by providing stored energy when the grid fails. On top of that, this smart technology can ...

The plant comprised grid connected hybrid powered flywheels and battery technology. The fast responding plant was designed to allow energy to be transferred from the electricity grid ...
