Should you upgrade your shipping container home with solar power?

Upgrading your shipping container home or your container office with solar power can help to reduce electricity costs or even make the transition to off-grid living possible. These systems can power heating, lights, computers, etc. making them highly convenient for shipping container homes, offices and so on.

Can solar power make shipping container-based facilities self-sustaining?

One example is Clinic in a Can, who provide fully equipped medical clinics inside solar-powered shipping containers. The Clinic in a Can project is a great example of how solar power can make shipping container-based facilities completely self-sustaining.

Can solar panels be used on shipping containers?

Solar panels on shipping containers provide a smart and sustainable way to generate energy, for container homes, offices, or remote shipping container facilities. Overall, they are a great way to use the roof of a shipping container.

Which air conditioning systems are suitable for shipping containers?

There are various air conditioning systems suitable for shipping containers, including window units, mini-split systems, and rooftop HVAC units. The choice depends on factors such as container size, power availability, and your specific cooling requirements. We'll help you select the right system for your shipping container.
