Corre Energy, a Dutch long-duration energy storage specialist, has partnered with utility Eneco to deliver its first compressed air energy storage (CAES) project in Germany.

This project will combine advanced research on the isothermal compression/expansion process with the development of a robust, ...

To overcome the problem of non-programmability of renewable sources, this study analyzes an energy storage system consisting of under water compressed air energy storage ...

CAES startups create energy storages using compressed air. Hydrostor is a creator of Advanced Compressed Air Energy Storage (A-CAES) - long-duration, emission-free, ...

Italian startup Energy Dome has moved one step closer to commercializing its unusual energy storage technology by securing a total of \$ 60 million in Series B financing, ...

For Italian air energy storage suppliers, this isn't just business--it's a culinary-style revolution where batteries and CO2 systems replace pasta as the new staple.

OverviewTypesCompressors and expandersStorageEnvironmental ImpactHistoryProjectsStorage thermodynamicsCompressed-air-energy storage (CAES) is a way to store energy for later use using compressed air. At a utility scale, energy generated during periods of low demand can be released during peak load periods. The first utility-scale CAES project was in the Huntorf power plant in Elsfleth, Germany, and is still operational as of 2024 . The Huntorf plant was initially de...

Italian startup Energy Dome stores energy in liquid CO2 when energy is abundant, then converts it back into

gas to turn turbines on ...

Italian startup Energy Dome stores energy in liquid CO₂ when energy is abundant, then converts it back into gas to turn turbines on demand.

This project will combine advanced research on the isothermal compression/expansion process with the development of a robust, industrial-grade gas compressor stored in a containerised ...

Compressed-air-energy storage (CAES) is a way to store energy for later use using compressed air. At a utility scale, energy generated during periods of low demand can be released during ...

Energy Dome, an Italian startup, is turning to CO₂, the leading culprit of the climate crisis, to try to solve this lasting conundrum by compressing the greenhouse gas into a liquid ...

CAES startups create energy storages using compressed air. Hydrostor is a creator of Advanced Compressed Air Energy Storage (A ...

To overcome the problem of non-programmability of renewable sources, this study analyzes an energy storage system ...

Energy Dome, an Italian startup, is turning to CO₂, the ...

Alongside the commercial agreement, it has also invested an undisclosed sum in the Italian start-up, which has developed a novel approach to energy storage, using CO₂ held ...
