-----  
What happened to Kyiv's power?

Power has been restored to over 800,000 residents in Kyiv, a day after Russia launched major attacks on Ukraine's power grid, causing widespread blackouts.

How many generators did USAID transfer to Kyivteploenergo?

The United States Agency for International Development (USAID), through the Energy Security Project, transferred 137 generators worth about UAH 40 mln to the Communal Utility Kyivteploenergo (CU KTE).

What happened in Kyiv after a gas attack?

"Emergency repair work is ongoing, and most consumers had their power restored by Monday morning," it said. Mykola Kalashnyk, the governor of Kyiv region, said the attack had damaged the local gas grid and that over 8,000 properties in eight settlements would be disconnected from their gas supply over the next two days as repairs were carried out.

Why did CU Kyivteploenergo switch boiler houses to generators?

The CU Kyivteploenergo's staff quickly mastered the algorithms of switching the boiler houses to generators. Those processes, earlier practiced during training sessions on generator usage, became a part of their routine work. "During emergency power outages, the generators enabled us to be ready for a blackout scenario.

In 2024, energy in Ukraine faced an infrastructure crisis unprecedented in its national history as a result of sustained Russian military attacks on its power generation facilities and transmission networks, in addition to disconnection from the Russian and Belarusian energy grid. The situation created significant challenges during the 2024 winter season, with the country's generating capa...
