-----  
Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Do solar inverters contain undocumented cellular radio devices?

These inverters, which are essential components that convert direct current from solar panels into alternating current usable by the electrical grid, were found to contain undocumented cellular radio devices not disclosed in product specifications or technical documentation.

Which solar inverter manufacturers have vulnerabilities?

In March, researchers from Forescout Research's Vedere Labs uncovered vulnerabilities in solar power systems after analyzing six major inverter manufacturers, including Huawei, Sungrow, and SMA Solar Technology.

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters ...

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by U.S. experts who strip down equipment ...

That raises the question: Could mobile solar container units be giving rooftop systems in cities or even grid-connected solar a run for their money soon? For some uses, like ...

Technical experts conducting detailed hardware inspections, or "teardowns," of inverters connected to U.S. power grids revealed the presence of unauthorized communication ...

U.S. experts have allegedly found rogue communication devices, including cellular radios, in Chinese-made solar inverters and batteries over the past nine months.

The two people declined to name the Chinese manufacturers of the inverters and batteries with extra communication devices, nor say how many they had found in total.

Using the rogue communication devices to skirt firewalls and switch off inverters remotely, or change their settings, could destabilise power grids, damage energy ...

U.S. experts have allegedly found rogue communication devices, including cellular radios, in Chinese-made solar inverters and ...

The two people declined to name the Chinese manufacturers of the inverters and batteries with extra communication devices, nor say ...

U.S. energy-sector forensic teams have begun disassembling Chinese-manufactured solar inverters and grid-scale batteries after discovering undocumented 4G/LTE modules and other ...

U.S. energy-sector forensic teams have begun disassembling Chinese-manufactured solar inverters and grid-scale batteries after ...

The closure of numerous solar contractors in 2024 has sent ripples through various facets of the solar market, affecting customers, ongoing projects, and the industry.

The closure of numerous solar contractors in 2024 has sent ripples through various facets of the solar market, affecting customers, ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within ...

That raises the question: Could mobile solar container units be giving rooftop systems in cities or even grid-connected solar a run for ...
