IPP JCM Power and the US Trade and Development Agency (USTDA) are procuring a feasibility study for a project in Malawi ...

The Malawi BESS project aligns with the COP29 Presidency's Global Energy Storage and Grids Pledge, targeting a sixfold ...

IPP JCM Power and the US Trade and Development Agency (USTDA) are procuring a feasibility study for a project in Malawi combining 50MW wind power generation ...

The power plant, which uses U.S. technology, is the first utility-scale grid-connected battery energy storage system in sub-Saharan Africa, providing reliable, clean power to the ...

The project aims to support ESCOM, which is a government-owned utility in Malawi, in its efforts to reduce poverty and business costs. This will be done by revitalising the ...

Discover how the 10MW Salima Solar Project is tackling Malawi's power shortages, boosting sustainable development, and paving the way for a low-carbon economy.

The 20MW Golomoti Solar PV and Battery Energy Storage Project in Malawi has successfully entered commercial operations. The project is the first utility-scale grid-connected hybrid solar ...

The study aims to explore the technical, economic, and environmental viability of establishing wind energy generation and battery storage capabilities in Malawi.

The project aims to support ESCOM, which is a government-owned utility in Malawi, in its efforts to reduce
