What is a dual-glass module?

Dual-glass type modules (also called double glass or glass-glass) are made up of two glass surfaces, on the front and on the rear with a thickness of 2.0 mm each. Some manufacturers, in order to reduce the weight of the modules, have opted for a thickness of 1.6 mm. Dualsun has chosen to stay with a thickness of 2.0 mm for reasons explained below.

What is a double glass module?

In contrast, double glass modules replace the polymer layer with another glass sheet, creating a robust sandwich structure. At IBC SOLAR, we use 2,0 mm x 2,0 mm glass layers, whereas some other market offerings use thinner 1,6 mm x 1,6 mm layers. This ensures greater durability and longevity.

What is a glass-backsheet module?

In the case of a glass-backsheet module, not only is the upper glass layer thicker (3.2 mm versus 2.0 mm) but also this layer is fully tempered glass, whereas in the case of a thickness of 2.0 mm, the glass is only semi-tempered due to technical limitations of the tempering process.

What is a double glass solar module?

In the ever-evolving world of photovoltaic technology, double glass solar modules are emerging as a game-changer. By encapsulating solar cells between two layers of glass, these modules offer unparalleled durability and efficiency. But what exactly sets them apart? What are double glass solar modules?

At IBC SOLAR, we are committed to providing cutting-edge photovoltaic solutions tailored to diverse needs. Our partnership with ...

As one of the leading double glass module manufacturers and suppliers, we warmly welcome you to wholesale cheap double glass module from our factory. All our products are with high ...

Nestled in the Mdimba Mountains of northwestern Eswatini (formerly Swaziland), Mbabane serves as the administrative capital of this small, landlocked kingdom. As the ...

At IBC SOLAR, we are committed to providing cutting-edge photovoltaic solutions tailored to diverse needs. Our partnership with leading manufacturers ensures a range of high ...

Double Glass is especially important in photovoltaic facilities such as solar power plants and with the expected long service life of modules such as AKCOME, Jinery or Jollywood.

Global Double Glass Module Photovoltaic Glass Market Insights, Forecast to 2030 - This research report focuses on the Double Glass Module Photovoltaic Glass Market. It ...

Despite these challenges, the long-term growth outlook for the double glass module photovoltaic glass market remains positive, driven by the increasing global reliance on ...

Mbabane (pronounced Um-ba-ba-neh) is Eswatini's (Swaziland's) capital city and has a magnificent setting, ringed by the craggy backdrop of the Dlangeni Hills.

Mbabane, capital and largest town of Swaziland. Located in the Highveld of western Swaziland, Mbabane developed near the cattle kraal of the Swazi king Mbandzeni in the late 19th century.

As one of the leading double glass module manufacturers and suppliers, we warmly welcome you to wholesale cheap double glass module from our ...

East Asia, particularly China, dominates double glass module photovoltaic glass manufacturing due to its vertically integrated supply chain and aggressive government support.

Mbabane is the administrative capital of Eswatini (formerly Swaziland) and is located on the Mbabane River and its tributary the Polinjane River in the Mdimba Mountains. It is the second ...

Mbabane is the largest city of Eswatini (formerly Swaziland). It houses Sibebe Rock, one of the biggest mountains in Africa. It sits on the banks of the Mbabane River and its tributary the ...

The thickness of the front glass generally used for this type of structure is 3.2 mm. Dual-glass type modules (also called double glass or glass-glass) are made up of two glass surfaces, on the ...

Nestled in the scenic Dlangeni Hills, Mbabane, the executive capital of the Kingdom of Eswatini (formerly Swaziland), offers a charming introduction to this unique ...
