Who built Mozambique's first large-scale solar power plant?

Capital and expertise from Scatec Solar, KLP and Norfund enabled the construction of Mozambique's first large-scale solar power plant. Central Solar de Mocuba (CESOM) provides over 79 GWh of electricity annually, which is equivalent to the electricity consumption of more than 170,000 households in Mozambique.

What is central solar de Mocuba?

Central Solar de Mocuba has increased Mozambique's energy generation capacity by 40 MW and will produce approximately 79 GWh per year. The project's strategic location will reduce energy transmission losses and improve the security of energy supply in northern Mozambique and stabilize the grid.

How will Mozambique's power plant's strategic location affect the grid?

The project's strategic location will reduce energy transmission losses and improve the security of energy supply in northern Mozambique and stabilize the grid. It is estimated that the power plant's connection to the EDM grid will result in a seven percent improvement in the network default level.

Why did EDM join central solar de Mocuba?

It was also a unique opportunity for EDM to gain technical, commercial and practical experience in utility-scale solar solutions. Central Solar de Mocuba has increased Mozambique's energy generation capacity by 40 MW and will produce approximately 79 GWh per year.

This summary covers an application by Globeleq Africa Limited (GAL) for its equity and quasi-equity investments in CESOM - Central Solar de Mocuba, S.A. (CESOM) in ...

Recently announced, the tender aims to select two independent power producers (IPPs) to develop, finance, build, operate, and transfer solar-plus-storage projects in Nampula, ...

Mozambique plans new solar energy plant as part of its "true solar revolution" The 60 MW plant will be built in the southern province of Maputo, near the ...

The project's impact goes beyond energy generation: It has created over 1,200 jobs during construction, implemented a Livelihood Restoration Plan for 223 displaced families, offering ...

The project is set to provide electricity to over 150,000 homes and will create more than 1,500 jobs during the construction phase, contributing to the development of the local and ...

Planned for Moamba in Maputo Province, the project will help Mozambique tap into its abundant solar resources, diversifying its energy mix and reducing its reliance on ...

Mozambique plans new solar energy plant as part of its "true solar revolution" The 60 MW plant will be built in the southern province of Maputo, near the South African border at a cost of ...

Planned for Moamba in Maputo Province, the project will help Mozambique tap into its abundant solar resources, diversifying its energy ...

A community of farmers found new hope in the construction of the Mocuba solar plant that is providing consistent, clean, and affordable energy to homes and small businesses in ...

The project is set to provide electricity to over 150,000 homes and will create more than 1,500 jobs during the construction phase, ...

Central Solar de Mocuba has increased Mozambique's energy generation capacity by 40 MW and will produce approximately 79 GWh per year. The project's strategic location ...

The solar plant will be developed under the Cahora Bassa Hydroelectric (HCB) framework to expand national and regional electricity supply. The initiative is expected to ...

It comprises 121,500 solar panels. Its output is sold directly to the Electricidade de Moçambique (EDM), for integration into the national grid, under a 25-year power purchase agreement.
