10 years of R& D and production experience, certified inverter manufacturer according to EU standards. The annual production capacity is over 300000, with strict requirements for every ...

Field annealed uncut nanocrystalline cores with a Square (oval) shape offer an economical solution for MFT designs regarding high efficiency, high power density, and low acoustic noise ...

Buy New High-Power Special Inverter Intelligent Nano Amorphous Head 12V Battery Boost Power Convert online today!

The air gap free amorphous ring inductor core is a high-performance magnetic component with high permeability, strong saturation ...

Product Summary: 1pcs Nano-amorphous Ultra-microcrystalline Core Ring Anti-Interference 23 * 33 * 25 Mold Inductance High Power Inverter From GHHSBO

The air gap free amorphous ring inductor core is a high-performance magnetic component with high permeability, strong saturation magnetization, low coercivity, excellent frequency ...

High frequency power transformer (inverter transformer) is a kind of transformer widely used in ac/dc conversion. Nanocrystalline materials ...

While Amorphous cores remain vital in large-power filtering and lower-frequency applications due to their high saturation flux density and cost advantages, Nanocrystalline ...

Nano amorphous magnetic cores are a material with outstanding magnetic conductivity, using rapid cooling solidification production process.

They are commonly used in metering and protective relaying in the power plants and substations where they facilitate the safe measurement of large currents, often in the presence of high ...

High frequency power transformer (inverter transformer) is a kind of transformer widely used in ac/dc conversion. Nanocrystalline materials can effectively reduce the volume of iron core.

Nano amorphous magnetic cores are a material with outstanding magnetic conductivity, using rapid cooling solidification production process. A typical amorphous alloy ...
