Federal electricity regulators on Tuesday approved a proposal from the nation's largest electric grid operator that could effectively give new natural gas power plants priority in ...

The NENY Supply Chain Development team is dedicated to the development and expansion of manufacturing and service providers to enable and ...

Generator deactivations are &gt; Repowering aging power plants &gt; Driven by public policies, new outpacing new supply additions. Electrification programs and new large-load ...

Power generation is at the heart of NYPA's mission--and the core of our business. NYPA is the largest state public power utility in the country. Thanks largely to NYPA's three large-scale ...

But New York has a unique tool in its clean energy toolbox: the New York Power Authority, or NYPA, a public ...

The NENY Supply Chain Development team is dedicated to the development and expansion of manufacturing and service providers to enable and grow New York State's supply chain and ...

Today, about three-quarters of New York's primary energy comes from fossil fuels, mostly natural gas (39%) and petroleum (36%). ...

Today, about three-quarters of New York's primary energy comes from fossil fuels, mostly natural gas (39%) and petroleum (36%). The electric power sector uses the most ...

This paper aims to provide an overview of the key technologies underpinning the new-type power system from four perspectives: grid technology, energy-efficient utilization ...

But New York has a unique tool in its clean energy toolbox: the New York Power Authority, or NYPA, a public institution that supplies a significant portion of the state's power ...

Even on mild days, our gas and electric systems are taxed, and New York City does not yet have the clean, renewable power that advocates insist can power a fully electrified future.

It includes an outlook through 2040 with recommendations for meeting future energy demands that prioritize an energy system that is abundant, reliable, affordable, and clean while ...

New York has set a goal for 100 percent clean energy on its grid by 2040 to reduce carbon emissions and slow the progress of climate ...

Federal electricity regulators on Tuesday approved a proposal from the nation's largest electric grid operator that could effectively give ...

Even on mild days, our gas and electric systems are taxed, and New York City does not yet have the clean, renewable power that ...

New York has set a goal for 100 percent clean energy on its grid by 2040 to reduce carbon emissions and slow the progress of climate change. The effort that will require a wide ...
