-----  
What is the first Renewable Project in New Zealand?

01 JUL 2024 Contact's first renewable project in Auckland to start immediately. Tesla selected as battery energy storage system supplier, the first Megapack 2 XL project in New Zealand. The battery system will discharge stored energy at a split second to significantly improve security of energy supply to New Zealanders.

How will a lithium battery help New Zealand's electricity supply?

Contact's CEO Mike Fuge says the industrial-sized lithium battery will play a key role in maintaining a reliable supply of electricity for New Zealand, particularly during periods of high demand throughout the winter. It will also ultimately help with Contact's transition away from an increasingly constrained gas market.

Will contact make New Zealand's biggest battery?

Contact, in the agreement with Tesla, also has the option to expand the capacity of the battery to 130 MW at this site; a move which would make it New Zealand's biggest battery. The battery will store excess renewable electricity, often generated by the wind or sun in off-peak periods when demand is low, which would otherwise go to waste.

What is New Zealand's biggest battery?

This will be the country's newest large-scale battery, the closest to the largest city, and Tesla's first Megapack 2 XL system in New Zealand. Contact, in the agreement with Tesla, also has the option to expand the capacity of the battery to 130 MW at this site; a move which would make it New Zealand's biggest battery.

Contact Energy (Contact) has answered calls for more energy storage by contracting with Tesla to build a 100-megawatt (MW) battery, ...

BESSNZ is a new company focused on Commercial & Industrial (C& I) and large Residential battery energy
