North Korea's recent deployment of containerized energy storage vehicles (CESVs) shows how mobile battery systems could redefine energy access in challenging environments.

When you think of cutting-edge energy storage, North Korea might not be the first country that comes to mind. But here's the twist: this isolated nation has been quietly ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

The team developed a structural battery by depositing carbon nanotubes on quartz-woven fabrics with efficient charge transport and retention.

Batteries manufactured by Korea's top three battery makers -- LG Energy Solution, SK Innovation and Samsung SDI -- are lithium-ion batteries, where electricity is made by lithium ions moving ...

Operational since January 2016, the two new systems, along with a Kokam 16 MW / 5MWh Lithium Titanate Oxide energy storage system deployed in August 2015, provide South ...

North Korea's battery storage boxes aren't just oversized power banks. They're built with LFP (lithium iron phosphate) cells --the same tech used in Tesla's Powerwall [9].

Let's face it--when you hear "North Korea" and "energy" in the same sentence, coal-fired power plants probably come to mind first. But here's something that might surprise you: satellite ...

In this new series, 38 North will look at the current state of North Korea's energy sector, including the
