How many schools currently use solar energy?

Nearly 5,500 schools currently use solar energy systems. This number will continue to grow rapidly as solar panel efficiencies improve and manufacturing costs decline.

How do I select a solar system for my school?

To choose the right solar system for your school, consider the following factors: energy usage trends, electricity consumption, and a thorough understanding of the facilities. The solar system chosen should meet the financial and energy needs of the school, both current and future.

Why is solar power successful in K-12 schools?

A fundamental reason for solar power's success in K-12 schools is the wide range of benefits offered to stakeholders. Nearly 5,500 schools currently use solar energy systems and that number will continue a rapid ascent as solar panel efficiencies improve and manufacturing costs decline.

What happens when a school uses a solar system?

When a school uses a solar system, the building continues to use electricity from the utility when its power demands exceed the solar system's production. At the end of the billing cycle, the school's electric bill reflects the total energy consumed minus the electricity that was produced by the solar system.

Financial support through renewable energy funding and solar power incentives makes these projects more accessible than ever. This overview highlights key grant programs ...

Now, public and nonprofit schools can receive the equivalent of a tax credit as a cash payment from the IRS. In many cases, that payment can be used as unrestricted cash, ...
