How do I install a battery disconnect switch on my inverter?

Ensure the Inverter Switch is in the OFF position. When all components are installed properly, connect the Positive (red) Battery Terminal to the Positive (red) Post on the Battery. Turn ON the Battery Disconnect Switch. Turn ON the Inverter. The final step is to test for proper operation according to the inverter user manual.

Do I need a new inverter if I have more than one battery?

Your power demands may require equipment of different sizes. If you have more than one battery in your camper, you only have to connect one battery to your new inverter because the other battery/batteries should be already connected in parallel (from the factory) and therefore will be automatically part of the new system you're installing.
