What should I do if a circuit breaker is not closed?

If the new breaker does not remain closed and/or behaves similarly to the original breaker, shut off the power and contact a licensed, competent, and insured electrician. If you cannot find the main power cut off switch, do not attempt to remove a circuit breaker or work on the circuit panel. Contact an electrician.

When should you replace a circuit breaker?

The main circuit breaker is a critical component of your home's electrical system, responsible for controlling the electricity flow and protecting the circuits from overloads or faults. Replacing it is necessary when it shows signs of wear or damage. 1.

Can I replace my main breaker myself?

DO NOT attempt to replace the main breaker yourself. Call a licensed, competent, and insured electrician to handle this situation. DO NOT attempt to access the meter box, underground wiring/overhead cable, or any equipment owned and/or maintained by your power company. Call your power company if any of their equipment needs service.

What should I do if I need a new circuit breaker?

Replacement main circuit breaker - Smart breaker (if upgrading) 1. Safety First: - Turn off all appliances and devices connected to your electrical system. - Wear insulated gloves and goggles to protect yourself from electrical hazards. 2. Shut Off the Power: - Locate the main circuit breaker panel and shut off the main power supply.
