How do I fix a tripped breaker?

Prepare to Reset the Breaker: Ensure all connected appliances are turned off before resetting the tripped circuit.
Reset the Breaker: Firmly push the tripped breaker to the "off" position and flip it back to "on." Professional assistance may be necessary if it won't stay ON or immediately trips again (or if it's stuck in the middle).

How do I Reset my circuit breaker?

To reset the main breaker: Turn off all circuit breakers. Flip the main breaker's lever to the ON position. Turn the circuit breakers on again, but individually and not simultaneously. Before you get started on resetting your circuit breaker, check out these tips to ensure you are being smart and safe.

Can a breaker be reset without turning off?

Before resetting the breaker, ensure all appliances on the affected circuit are switched off to prevent power overload when power is restored. Attempting to reset a breaker without first turning off the appliances connected to that circuit can lead to immediate tripping and potential damage.

What happens if you reset a circuit breaker?

Once the breaker is reset, your lights should come back on. Walk around your house testing switches, outlets, and appliances to ensure nothing was damaged and that power is fully restored to your house. What if resetting the circuit breaker didn't fix your power? In this case, your breaker may have really "blown."
