Looking to 2030, Riga plans to deploy liquid air storage - essentially bottling winter cold for summer AC use. It's like making snowballs in July, but for real energy savings.

Given Latvia's high share of renewable electricity, the need for electricity storage technologies will increase significantly. However, there ...

As part of its strategic commitment to maintaining a leading position in renewable energy across the Baltic states, Latvenergo Group ...

As part of its strategic commitment to maintaining a leading position in renewable energy across the Baltic states, Latvenergo Group plans to install 250 MW of battery storage ...

Given Latvia's high share of renewable electricity, the need for electricity storage technologies will increase significantly. However, there are also challenges, such as the need ...

As we approach Q4 2025, Riga's storage capacity is projected to triple, potentially eliminating the need for one natural gas peaker plant entirely. Now that's what we call powering progress!

Will a solar energy park be built in the port of Riga? Today, on 9 September, an agreement was signed between the Freeport of Riga Authority and the Lithuanian company SNG Solar on the ...

This deal marks the beginning of a major solar energy project at the port of Riga, which will include the installation of solar panels, the production and storage of renewable electricity, and ...

Backed by BlackRock's Diversified Infrastructure business, Jupiter Power has a strategic and established portfolio of utility-scale energy storage projects operating or in construction in the ...

The plan is to invest in battery energy storage system technology by installing 250 MW of power with a capacity of 500 MWh by 2030.

Summary: The Riga battery energy storage project represents a critical step in advancing renewable energy integration and grid stability in the Baltic region. This article explores the ...

Commissioned by energy developer Rigas Siltums, this r25 million investment will provide the Latvian capital with a single high-efficiency plant that will meet growing demand for heat and ...
