California's Clean Transportation Program invests \$2.9 million in a groundbreaking project that equips school buses with bidirectional ...

The pilot program launched by ComEd represents a significant advancement in the integration of electric school buses into the energy grid through bidirectional charging technology.

While there are many different exciting opportunities for advanced charging solutions that employ bidirectional charging, there are also a few immediate barriers that still exist.

Based on interviews with utilities, school districts and ESB operators that are making V2G happen across the country, this article offers updates, lessons learned and ...

California's Clean Transportation Program invests \$2.9 million in a groundbreaking project that equips school buses with bidirectional charging, turning them into mini power ...

What: 6 new ESBs connected to 60 kW bidirectional DC fast chargers as part of a pilot program in partnership with SDG& E and Nuvve Where: Cajon Valley Union School ...

Chicago-area utility ComEd is partnering with Nuvve to explore the potential of bidirectional charging, using electric school buses to ...

The California Energy Commission (CEC), through its Clean Transportation Program, has granted a \$2.9 million award to a project ...

The project uses bidirectional charging technology from Virginia-based Fermata Energy, whose artificial
