The HyBReED project brings together 15 leading Slovenian partners in the field of hydrogen technologies, batteries and industrial transition, among which are recognized ...

Technological Innovations and Social Integration as part of its strategy to increase energy self-sufficiency and independence. The ongoing debate on building a second unit at the Krsko ...

Jinko ESS recently signed a contract for a 15 MWh large-scale energy storage project in Slovenia, further expanding its business footprint in the European market.

That's exactly what Ljubljana's energy storage power initiative is achieving. Nestled in Slovenia's capital, this project combines cutting-edge battery tech with smart grid ...

The strategy includes co-locating BESS with solar and PHES projects, using the EU's Just Transition Fund and state aid for financing. Currently, the BESS market is led by ...

Could this integrated approach become the blueprint for mid-sized cities worldwide? Industry analysts suggest similar systems might reduce energy storage CAPEX by 30-45% compared ...

Slovenia targets 400 MW in BESS, 100 MW in electrolyzers and more pumped storage in the updated Integrated National Energy and Climate Plan.

Integrated energy systems have become an area of interest as with growing energy demand globally, means of producing sustainable energy from flexible sources is key to meet future ...

We develop innovative processes for a successful raw material and energy turnaround - for example by
