-----

Singapore could sit at the "core" of new regional electricity grids in Southeast Asia, according to research from Rystad Energy.

In the Philippines, momentum is building. The Department of Energy's fourth Green Energy Auction (GEA-4) is the first to integrate ...

Asian countries are actively investing in renewables with solar, wind, offshore wind and hydro among the most utilised. The issue now ...

In this study, the role of short-term off-river energy storage (STORES) in supporting 100% renewable electricity in Southeast Asia is investigated.

Four original case studies of solar power inverter systems with lithium batteries deployed in Southeast Asia--design choices, ...

This study explores the growth of solar power in seven key Asian countries, the potential for future growth and the avoided fossil fuel costs due to solar electricity generation ...

Asian countries are actively investing in renewables with solar, wind, offshore wind and hydro among the most utilised. The issue now facing many markets is stability. This has ...

Enabled by their mass deployment and ambitious policy support, innovations in solar cells, wind turbines, energy storage systems ...

Four original case studies of solar power inverter systems with lithium batteries deployed in Southeast

Asia--design choices, performance insights, and how storage cuts ...

This review explores the development of energy storage technologies and governance frameworks in the Asia-Pacific region, where rapid economic growth and ...

Opportunities still exist for investors in Southeast Asia, particularly in the co-location of renewables projects with energy storage and Singapore's ongoing procurement of low-carbon ...

In the Philippines, momentum is building. The Department of Energy's fourth Green Energy Auction (GEA-4) is the first to integrate energy storage with new solar capacity, which ...

Enabled by their mass deployment and ambitious policy support, innovations in solar cells, wind turbines, energy storage systems and grid technologies are becoming ...

As Asia gears up for a shift to renewable energy, energy storage has come to the fore. But the transition to cleaner power can be a bumpy ride. To navigate the uncertain landscape, ...
