-----

A U.S. solar industry group on Wednesday unveiled an aggressive goal to deploy vast amounts of energy storage capacity by 2030 to help renewables serve power-hungry ...

Together, solar and battery storage account for 81% of the expected total capacity additions, with solar making up over 50% of the ...

The landscape of energy in the United States is undergoing a significant transformation, with solar power and energy storage poised for ...

The U.S. is set for record renewable energy growth in 2025, with solar and battery storage leading capacity additions. Policy changes under Trump, including offshore wind ...

The landscape of energy in the United States is undergoing a significant transformation, with solar power and energy storage poised for remarkable growth by 2025.

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt ...

Solar power and battery storage are expected to lead new U.S. generating capacity additions in 2025, according to the Energy Information Organization (EIA). The EIA ...

Battery storage capacity additions through 2026 are expected to outpace wind, small-scale solar and natural gas, according to the ...

US battery storage already achieved record growth in 2024 when power providers added 10.3 GW of new

battery storage capacity. ...

Battery storage capacity additions through 2026 are expected to outpace wind, small-scale solar and natural gas, according to the Energy Information Administration.

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, ...

A U.S. solar industry group on Wednesday unveiled an aggressive goal to deploy vast amounts of energy storage capacity by ...

Solar and battery storage are expected to lead new US generating capacity additions in 2025, says the US Energy Information Administration (EIA).

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW ...

US battery storage already achieved record growth in 2024 when power providers added 10.3 GW of new battery storage capacity. This growth highlights the importance of ...

Together, solar and battery storage account for 81% of the expected total capacity additions, with solar making up over 50% of the increase. In 2024, solar generators added a ...
