What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

Who is solarcont GmbH?

SolarCont GmbH was created through a cooperation between the two successful companies Hilber Solar GmbH from beautiful Tyrol and the company Gfölner Fahrzeugbau und Containertechnik GmbH, which is deeply rooted in Upper Austria. This cooperation makes it possible to develop a completely new type of mobile solar system.

Who makes Renata Batteries?

Founded in 1952 as a producer of mechanical watch parts, RENATA was transformed into a specialised button cell maker in the late Seventies. Today, the Itingen plant produces more than 1 million micro batteries every day. Thanks to a high degree of verticalization, RENATA is reputed as an extremely flexible and reliable battery source.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

Leclanché SA is a leading manufacturer of advanced energy storage solutions, particularly focusing on lithium-ion cell technology. The company develops customized battery systems ...
