-----  
Is Panasonic leaving solar and battery storage?

Panasonic, once a household name in the solar panel and energy storage space, has officially exited the solar and battery storage market after decades of involvement.

Does Panasonic still make solar panels?

The company produced solar panels, inverters and batteries for the residential market for over 25 years and was once a major solar supplier to SolarCity/Tesla dealers. Panasonic said it would honor all warranties, and customers can email the company for support. "We have made the decision to discontinue our solar and battery storage business line.

Why did Panasonic stop making solar panels?

Panasonic also transitioned to panels with larger wafers to follow industry trends. At the time, Panasonic director of solar Mukesh Sethi exclusively told Solar Power World that the decision to end in-house manufacturing was financial. "We have been the pioneer in heterojunction technology, making panels for the past 25 years.

Is solar and energy storage a good business fit?

While we continue to believe in the potential of solar and energy storage, it is no longer the right business fit for us at this time. Panasonic pledged to honor all warranties, including those for systems not fully installed, and committed to supporting customers with clear guidance on third-party warranty coverage.

On Monday, Panasonic wrote on its website that it would discontinue its solar and battery storage line, which includes its popular ...
